UNIT 1 · PLACE VALUE

Changing Values

تغيير القيم

WHAT YOU WILL LEARN TODAY

أهداف الدرس

- I can explain how the value of a digit changes as it moves to the left in a number.
يوضح كيف تتغير قيمة الرقم عندما يتحرك جهة اليسار داخل العدد.
- I can describe the patterns I see as a digit changes value.
يصف الأنماط التي يلاحظها عندما تتغير قيمة الرقم.
- I can multiply a number by 10 and say what happens to it.
يضرب العدد في 10 ويوضح ماذا يحدث له.
- I can tell how many times bigger one place is than another.
يحدد كم مرة تكون منزلة أكبر من منزلة أخرى.
- I can count how many tens, hundreds or thousands are inside a number.
يعدّ كم عشرة أو مئة أو ألف داخل العدد.

LESSON EXPLANATION · UNIT 1 · LESSON 2

Changing Place Values – Let's Learn

شرح الدرس

1 Moving LEFT makes the value 10 times bigger

التحرك يسارًا يَكْبُرُ القيمة ١٠ مرات

Keep the **same digit** and move it one place to the **left**. Every step multiplies its value by **10**.

كُذْ نفس الرقم وحركه منزلة واحدة جهة اليسار — كل خطوة تضرب قيمته في 10.

REMEMBER · احفظ

The digit does not change. Only its PLACE changes — and the place decides the value.

الرقم نفسه ما يتغيرش، اللي بيتغير هو مكانه — والمكان هو اللي بيحدد القيمة.

WATCH OUT! · خلي بالك

Adding a zero on the right is the same as multiplying by 10 — but only for whole numbers.

زيادة صفر على اليمين = الضرب في ١٠، وده في الأعداد الصحيحة فقط.

TRY IT · جرب بنفسك

1. The value of 4 in the Ten Thousands place =
2. The value of 4 in the Hundreds place =

Answers: 1) 40,000 · 2) 400

2 Ten of these make one of those

كل عشرة منها تساوي واحدة من الي بعدها

Our number system is built on **tens**. Each place is worth **10 times** the place on its right.

نظام الأعداد عندنا مبني على **العشرات**. كل منزلة تساوي **10 أضعاف** المنزلة الي على يمينها.

EGYPT

Egyptian money works the same way: ten 10-pound notes make one 100-pound note, and ten 100-pound notes make one 1,000 pounds.

النقود المصرية بنفس الفكرة: عشر ورقات من فئة 10 جنيهات = ورقة 100 جنيه، وعشر ورقات 100 = 1000 جنيه.

$\times 10$
EACH STEP

جرب بنفسك • TRY IT

- The Thousands place is _____ times the Hundreds place.
- 100,000 is _____ times 10,000.

Answers: 1) 10 · 2) 10

3 Moving RIGHT makes the value 10 times smaller

التحرك يميناً يصغر القيمة 10 مرات

Going the other way divides by **10** at every step.

لو مشينا في الاتجاه الثاني، بنقسم على 10 كل خطوة.

▶ — moving RIGHT makes the value 10 times smaller · التحرك جهة اليمين يصغر القيمة 10 مرات

خلي بالك • WATCH OUT!

Count the **STEPS**, not the zeros of the answer. Two steps to the right means $\div 100$.

عد الخطوات مش الأصفار. خطوتين لليمين معناها $\div 100$.

جرب بنفسك • TRY IT

- $800 = 80,000 \div \text{_____}$
- $500,000 \div 10 = \text{_____}$

Answers: 1) 100 · 2) 50,000

أكبر بكام مرة؟

4 How many times bigger?

To compare the **same digit** in two numbers, count how many **places** apart they are. Each place is one $\times 10$.

عشان تقارن نفس الرقم في عددين، غدّ كام منزلة بينهم — كل منزلة تساوي $\times 10$.

5,600,000

value of 5 = 5,000,000

$\times 100$

2 places apart
 10×10

56,000

value of 5 = 50,000

جرب بنفسك • TRY IT

1. In 34,042 the 4 in the Thousands place is — times the 4 in the Tens place.
2. The Millions place is — times the Hundred Thousands place.

Answers: 1) 100 · 2) 10

عدّ العشرات والمئات والألوف

5 Counting tens, hundreds and thousands

How many hundreds are inside a number? **Cover the last two zeros** — what is left is the answer. For thousands cover three zeros.

كام مئة جوه العدد؟ غطّ آخر صفرين — اللي فاضل هو الإجابة. وللألوف غطّ ثلاث أصفار.

63~~00~~ → 63 hundreds **47**~~000~~ → 47 thousands

خلي بالك • WATCH OUT!

This shortcut works when the number ends with those zeros. Otherwise divide: $8,925,600 \div 100 = 89,256$ hundreds.

الاختصار ده ينفع لما العدد ينتهي بالأصفار دي، وغير كده اقسم: $89,256 = 100 \div 8,925,600$.

جرب بنفسك • TRY IT

1. 6,300 = — hundreds.
2. 920 = — tens.

Answers: 1) 63 · 2) 92

6 Ten times in real life

الضرب في ١٠ في الحياة

When you have **10 equal groups**, the total is 10 times one group. That is exactly the same rule.

لما يكون عندك **10 مجموعات متساوية**، الإجمالي = 10 أضعاف المجموعة الواحدة — نفس القاعدة بالضبط.

$$\begin{array}{|c|c|c|c|c|c|c|c|c|c|} \hline 156 & 156 & 156 & 156 & 156 & 156 & 156 & 156 & 156 & 156 \\ \hline \end{array} = 1,560$$

10 anthills × 156 ants in each = **1,560 ants**.

١٠ تلال نمل × ١٥٦ نملة في كل تل = ١٥٦٠ نملة.

EGYPT

Hoda has 64 notes of one hundred pounds. $64 \times 100 = 6,400$ pounds.

مع هدى 64 ورقة فئة المائة جنيه: $100 \times 64 = 6,400$ جنيه.

6,400
POUNDS

جرب بنفسك · TRY IT

1. 10 boxes, 45 pens in each box. Total =
2. 50 notes of one hundred pounds =

Answers: 1) 450 pens · 2) 5,000 pounds

**ACCESS** Multiplying by Ten

Use your Tens rods to explore patterns in multiplying by 10. 1) What quantity is represented by your Tens rods? Draw a picture, write an equation, or write a number to show the quantity. 2) What quantity is represented by your group's Tens rods? Draw a picture, write an equation, or write a number to show the quantity.

استخدم عيدان العشرات لاكتشاف أنماط الضرب في ١٠. ١) ما الكمية التي تمثلها عيدانك؟ ارسم أو اكتب معادلة أو عددًا. ٢) ما الكمية التي تمثلها عيدان مجموعتك؟

BUILD What Is My Value?

Follow the steps to explore how a digit's value changes when its location changes. Choose one digit and enter it in the Ones place · Record the value of the digit · Continue moving the digit card to the left on the place value chart, recording its new value each time.

اتبع الخطوات لاكتشاف كيف تتغير قيمة الرقم عندما يتغير موقعه: اختر رقمًا وضعه في منزلة الآحاد، سجل قيمته، ثم حركه جهة اليسار وسجل قيمته الجديدة كل مرة.

MILLIARDS		MILLIONS			THOUSANDS			ONES		
O		H	T	O	H	T	O	H	T	O

My digit is _____

Value of my digit in the Ones place _____

Value of my digit in the Tens place _____

Value of my digit in the Hundreds place _____

Value of my digit in the Thousands place _____

Value of my digit in the Ten Thousands place _____

Value of my digit in the Hundred Thousands place _____

Value of my digit in the Millions place _____

Value of my digit in the Ten Millions place _____

Value of my digit in the Hundred Millions place _____

Value of my digit in the One Billiards place _____

**BUILD Exploring Place Value Relationships**

Work with your teacher to explore place value relationships. Choose the value from the word bank that completes the sentence.

اعمل مع معلمك لاكتشاف العلاقات بين المنازل، ثم اختر القيمة المناسبة من بنك الكلمات.

1	10	100	1000
---	----	-----	------

As a digit moves one space to the left on the place value chart, its value = _____ times.

كلما تحرك الرقم منزلة واحدة جهة اليسار في جدول القيمة المكانية، أصبحت قيمته = أضعاف.

SB2

MINISTRY SCHOOL BOOK · LESSON 2

Connect – Writing About Math

كتاب المدرسة — اكتب عن الرياضيات

Omar and Mariam are myrmecologists (scientists who specialize in studying ants). They found a colony with 10 anthills. Remarkably, each anthill had the same number of ants. Look at each problem in the table. If Omar and Mariam found the given number of ants in each anthill, how many ants were there all together? Show your work for each problem.

عمر ومريم عالِمَا نمل، وجدا مستعمرة بها ١٠ تلال نمل، وكل تل به نفس عدد النمل. إذا كان في التل الواحد العدد المذكور، فكم عدد النمل كله؟ وضح خطوات حلك.

7 ants in 1 anthill _____ ants in 10 anthills.	92 ants in 1 anthill _____ ants in 10 anthills.
12 ants in 1 anthill _____ ants in 10 anthills.	156 ants in 1 anthill _____ ants in 10 anthills.
28 ants in 1 anthill _____ ants in 10 anthills.	1,786 ants in 1 anthill _____ ants in 10 anthills.

Classwork Activities

كتاب التقييمات — الأداء الصفّي

Activity 1 Playing with Digits

اللعب مع الأرقام

The digit 5 is in the Tens place. It moves to the left to the Hundred Thousands place. Complete.

الرقم ٥ في منزلة العشرات، وتحرك جهة اليسار إلى مئات الألوف. أكمل.

- 1) The value of 5 before the move = _____
- 2) The value of 5 after the move = _____
- 3) The value of 5 after the move = $50 \times$ _____

Activity 2 The Funny Digit Move

حركة الأرقام المرحّة

Your classmate moved the digit 8 from one place to another in the place value chart. Its value before the move was 80,000 and after the move 800. Complete.

حرّك زميلك الرقم ٨ من مكان لآخر داخل جدول القيمة المكانية. قيمته قبل الحركة ٨٠,٠٠٠ وبعدها ٨٠٠. أكمل.

- 1) The move was from the _____ place to the _____ place.
- 2) $800 = 80,000 \div$ _____

Activity 3 Count with Adel

احسب مع عادل

Adel has 73 notes of one hundred pounds. How many pounds does Adel have? Share your answer with your group.

مع عادل ٧٣ ورقة فئة المائة جنيه. فكم جنيهًا مع عادل؟ شارك إجابتك مع مجموعتك.

- 1) _____

AB2

MINISTRY ASSESSMENT BOOK · LESSON 2

Homework

كتاب التقييمات — الأداء المنزلي

Answer the following questions.

أجب عن الأسئلة التالية.

- 1) Write the number that is 10 times the number 48. _____
- 2) Which is greater: the value of the digit 6 in the Millions place or the value of the digit 9 in the Hundred Thousands place? _____
- 3) Samir has 50 notes of one hundred pounds. How many pounds does Samir have? _____
- 4) If one anthill has 75 ants, how many ants are there in 10 anthills? _____
- 5) How many hundreds are there in the number 8,925,600? _____

New Practice Questions

أسئلة جديدة

1 Write the value of the digit 4 when it sits in each of these places.

اكتب قيمة الرقم 4 عندما يكون في كل من المنازل الآتية.

a. Ones place _____

d. One Thousands place _____

b. Tens place _____

e. Ten Thousands place _____

c. Hundreds place _____

f. One Millions place _____

2 Complete.

أكمل.

a. _____ is 10 times 6,000.

b. _____ is 10 times 90,000.

c. 10 times the number 328 = _____

d. 10 times the number 7,405 = _____

e. When a digit moves one place to the left, its value becomes _____ times bigger.

f. When a digit moves one place to the right, its value becomes _____ times smaller.

g. $500,000 \div 10 =$ _____h. $6,000 = 60,000 \div$ _____

3 Complete.

أكمل.

a. 47,000 = _____ thousands.

b. 6,300 = _____ hundreds.

c. 920 = _____ tens.

d. 5,000,000 = _____ thousands.

e. 84 hundreds = _____

f. 36 tens = _____

g. 250 thousands = _____

h. 700 hundreds = _____ thousands.

i. 90,000 = _____ hundreds.

j. How many hundreds are there in 4,600? _____

4 Complete.

أكمل.

- a. The value of 5 in 5,600,000 is _____ times the value of 5 in 56,000.
- b. The value of 3 in the Thousands place is _____ times the value of 3 in the Hundreds place.
- c. The Ten Thousands place is _____ times the Thousands place.
- d. 1,000,000 is _____ times 100,000.
- e. 200,000 is _____ times 200.
- f. In 66,600 the value of 6 in the Ten Thousands place is _____ times its value in the Hundreds place.
- g. Which is greater: the value of 7 in the Ten Thousands place or the value of 9 in the Thousands place?

5 Complete the patterns.

أكمل الأنماط.

- a. 8 , 80 , 800 , _____ , _____
- b. 400,000 , 40,000 , 4,000 , _____ , _____
- c. Our place value system is based on _____.
- d. Each place is _____ times the place on its right.

Choose the correct answer. اختر الإجابة الصحيحة.

- 1 When a digit moves one place to the left, its value becomes _____ times bigger.
A. 10 B. 100 C. 1,000 D. the same
- 2 10 times the number 640 is _____
A. 64 B. 650 C. 6,400 D. 6,040
- 3 72,000 = _____ thousands.
A. 72 B. 720 C. 7,200 D. 7.2
- 4 58 hundreds = _____
A. 580 B. 5,800 C. 58,000 D. 5.8
- 5 The value of 9 in the Hundred Thousands place is _____ times its value in the Thousands place.
A. 10 B. 100 C. 1,000 D. 10,000
- 6 $30,000 \div 10 =$ _____
A. 3 B. 30 C. 300 D. 3,000
- 7 _____ is 10 times 45,000.
A. 4,500 B. 450,000 C. 55,000 D. 4,500,000
- 8 The Millions place is _____ times the Hundred Thousands place.
A. 10 B. 100 C. 1,000 D. 10,000
- 9 How many tens are there in 8,400? _____
A. 84 B. 840 C. 8,400 D. 8
- 10 A digit moves one place to the right, so its value is divided by _____
A. 1 B. 10 C. 100 D. 1,000
- 11 6,000,000 = _____ thousands.
A. 6 B. 60 C. 600 D. 6,000
- 12 In 44,400 the value of 4 in the Ten Thousands place is _____ times its value in the Hundreds place.
A. 10 B. 100 C. 1,000 D. 10,000
- 13 There are 10 boxes and each box has 37 pens. The total number of pens = _____
A. 47 B. 307 C. 370 D. 3,700
- 14 900 tens = _____
A. 90 B. 900 C. 9,000 D. 90,000
- 15 Which number is 100 times 250? _____
A. 2,500 B. 25,000 C. 250,000 D. 350

**Numbers Around Us** Read the table, then answer.

اقرأ الجدول ثم أجب.

FACT	NUMBER
One Egyptian note	100 pounds
One box of Egyptian dates	250 grams
One bus from Suez to Cairo	48 seats
One class in the school	35 students

- a. Hoda has 64 notes of one hundred pounds. How many pounds does she have? _____
- b. How many grams are there in 10 boxes of dates? _____
- c. How many seats are there in 10 buses? _____
- d. The school has 10 classes. How many students are there? _____
- e. How many hundreds are there in 6,400 pounds? _____

Answer the following. أجب عفا يأتي.

- 1 A factory makes 1,250 pencils in one day. How many pencils does it make in 10 days?

- 2 The value of a digit is 700,000. It moves one place to the right. What is its new value?

- 3 Write a number in which the digit 5 is worth 100 times the value of the digit 5 in the number 4,530.

- 4 Nour says that 4,000 is 10 times 40. Is Nour right? Explain.

- 5 How many hundreds are there in 52,900?

**Think!** فکّر!

- 1 A digit moved inside the place value chart and its value changed from 20 to 200,000. How many places did it move, and in which direction?
.....
.....
- 2 I am a 5-digit number and all my digits are 7. The value of my first digit on the left is how many times the value of my last digit?
.....
.....
- 3 Complete and explain the rule: 9 , 90 , 900 , _____ , _____ , _____
.....
.....

- A. 10 B. 100 C. 1,000 D. 10,000

**KEY**

FOR THE TEACHER

Answer Key

مفتاح الإجابة — للمدرس

SB1 — Activities

Exploring Place Value Relationships. 10 times

SB2 — Connect $70 \cdot 920 \cdot 120 \cdot 1,560 \cdot 280 \cdot 17,860$ (each number $\times 10$)**AB1 — Classwork**

1.1) 50

1.2) 500,000

1.3) 10,000

2.1) from Ten Thousands to Hundreds (two places to the RIGHT)

2.2) 100

3.1) $73 \times 100 = 7,300$ pounds**AB2 — Homework**

1) 480

2) The 6 — its value is 6,000,000, while the 9 is worth 900,000.

3) 5,000 pounds

4) 750 ants

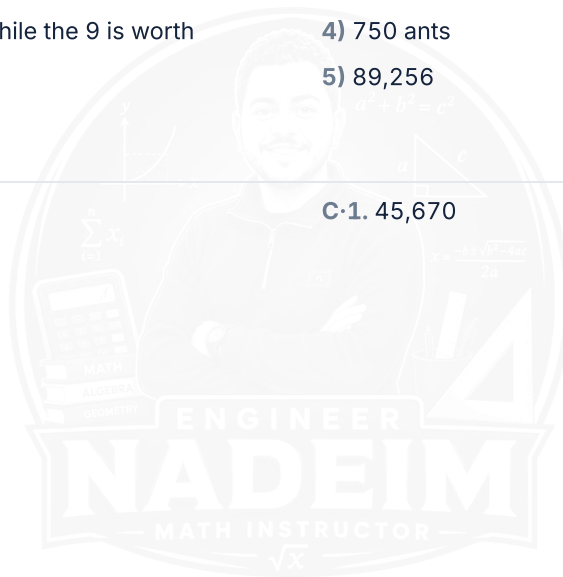

5) 89,256

AB3 — Weekly Assessment

A.1. 73,480

B.1. 95,180

C.1. 45,670

Page 19 / 20

2. 70,000

3. In 4,530 the 5 is worth 500, so we need a 5 worth 50,000 — any number with 5 in the Ten Thousands place, e.g. 358,000.

4. No. 10 times 40 is 400. 4,000 is 100 times 40.

5. 529

Think!:

1. $200,000 \div 20 = 10,000 = 10 \times 10 \times 10 \times 10 \rightarrow$ it moved 4 places to the LEFT.

2. $77,777 \rightarrow 70,000 \div 7 = 10,000$ times.

3. 9,000 , 90,000 , 900,000 — each number is 10 times the one before it.
